JSTOR Search Widget

Copy and paste the code below into your webpage to embed the JSTOR Search Widget.

```
<html>
<body>
  <div>
   <a href="http://www.jstor.org" target="_blank">
    <img style="border:none;float:left;margin-right:10px;"
src="http://widgets.jstor.org/wsearch/jstor_logo_small.gif">
   </a>
  <div style="float:left;width:400px;margin-top:20px;">
    <!--"Your use of the JSTOR Search Widget indicates your acceptance of
JSTOR's Terms and Conditions of Use
     available at http://www.jstor.org/page/info/about/policies/terms.jsp.
        In particular, please be aware of Sections 3.3 and 5.3 of our Terms
and Conditions of Use
        as these pertain to Access Software."-->
       <label for="basicSearchBox"
       style="font-size:8pt;
              font-weight:bold;
              color:#444444;
              font-family:'lucida grande',tahoma,verdana,arial,sans-
serif;">Search Articles in JSTOR</label>
    <form id="basicSearch" name="basicSearch"
     action="http://widgets.jstor.org/wsearch/searchredirect" method="get"
target="_blank">
       <input name="searchTerms" id="basicSearchBox" type="text" value=""
maxlength="200">
       <input type="submit" value="Search"
       style="background-color:#E5E3CB;
              border-color:#CAC594;
              border-style:solid;
              border-width:0pt 1px 1px 0pt;
              color:#71672D;
              font-size:.85em;
              margin:3px 2px;
              padding:0.0em;
              text-decoration:none;"/>
       <!--set proxy info here, if present (e.g.
"http://myuniversity.edu/proxy/?url=").
       If you don't have one, leave blank.-->
       <input type="hidden"  name="proxyinfo" value=""/>
       <!--count specifies the number of results per page-->
       <input type="hidden" name="count" value="25"/>
        <!--sorigin should be changed to reflect the domain name
        of your institution (e.g. "umich.edu" or "jstor.org")-->
       <input type="hidden" name="sorigin" value="yourdomainhere"/>
       </form>
     </div>
    </div>
</body>
</html>
```

Note: Only authenticated users will be able to access articles found through search results generated by the search widget. Don't hesitate to contact us with any questions you may have, but please note that the code included here is provided as-is. JSTOR will not be responsible for supporting the Search Box code if alterations are made to it.

There are a few optional steps you can take to optimize the functionality.

SORIGIN: We have provided a space in the code for an optional origin parameter, as we would like to know which institutions are using the widget. Please insert the name of your institution, library, or webpage. (Note: The widget will still work without this site name inserted into the code, assuming the user is authenticated. See below for proxy info.)

Proxy: If you are currently using a proxy for off-site access to JSTOR, we have included instructions in the code to have the search box route through your proxy. This will be helpful for users who will still need to authenticate in order to access JSTOR content.

Count: We have also provided a means to control the number of results displayed per page on the JSTOR site if so desired. This is not required but can be useful if you would like to see more or less results than the current default setting of 25 per page.

Below is a screen shot of the JSTOR Search Widget.
